Brian Byers

Full-Stack Web Developer

512.970.2365 | brian.p.byers@gmail.com | github: brianpbyers | brianpbyers.com

Summary

-Full-Stack Developer who leans towards back-end. Really enjoy logic challenges and problem solving.
-Extensive background in time-sensitive deadlines via career managing aviation companies.

Skills

Node.js	SQL(Postgres)	JavaScript	Ionic
Express	MongoDB	jQuery	HTML
Passport	Excel Super-User	Angular	Bilingual(Spanish)

Projects

Fantasy F1   MySQL, Node, Express, React
Created a fantasy sports platform for Formula 1 Fans. People can join/create leagues, edit their lineups, and view the lineups of other people

Longhaul   SQL(Postgres), Node, Express, Angular, Ionic
Used the Ionic framework and RTD's Google Real-Time-Feed data to build an app that provides users with real-time updates on their ETA, and alerts them when they are nearing their destination

Dine 5-2-1   MongoDB - Node - Passport - EJS - JavaScript - CSS - HTML
Developed web app around a dual-user model and the Yelp API that helps couples decide where to eat

SecretWords   JavaScript - jQuery - CSS - HTML
Multi-device recreation of the Codenames party game. Created a random seed that allows all devices to be synced to the same game board

Education

General Assembly	Bachelor of Science in Mathematics: Actuarial Science Focus
University of Texas at Austin	Web Development Immersive Program
